This is a new build in Killybegs, Co. Donegal, Ireland is the new headquarters for SeaQuest Systems, a producer of marine Fish Pumping systems; Winches; Net Sounders/Third Wire Winches; Deck Cranes; Tunnel Thrusters and Control Systems.

The office areas comprised of two floors of approximately 220M² each. Each floor is heated and air conditioned by a ComfortDisc system. The ComfortDisc system uses a heat pump as the primary source of heating and cooling with an oil fired boiler as the back-up and boost.

The building is nearing completion and the ComfortDisc system has been providing heating since December 2013 so the second fix carpentry and flooring could be completed.

With five zones per floor, the offices have a comfortable and efficient heating and air conditioning system.

Fresh air is provided by two heat recovery units that extract out of the toilet areas and canteens. The fresh air is then distributed by the ComfortDisc system into every room.

Application:

Commercial

Location:

Killybegs
Ireland

Equipment:

Two ComfortDisc systems, 10 zones, two heat recovery units & associated ducting, two Daikin ERQ140 heat pumps
